

REGISTRATION AND ACCREDITATION

Tuition includes all educational sessions, course syllabus, and refreshments the day of the course. You will receive written confirmation of your registration. To receive Category I credit, providers are required to attest to how many hours they were actually present at the given activity by completing a Verification of Hours form provided by the CME office. Failure to return this form will result in denial of credit for that activity.

Group Health Cooperative is accredited by the Washington State Medical Association CME Accreditation Committee to sponsor continuing medical education activities for physicians. Group Health Cooperative designates this educational activity for a maximum of **7.25 hours in Category I** to satisfy the re-licensure requirements of the Washington State Medical Quality Assurance Commission. Group Health Cooperative designates this educational activity for a maximum of **7.25 AMA PRA Category 1 Credit(s)**[™]. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Group Health Cooperative requires that faculty participating in a GHC CME activity disclose to the audience any relationship with a commercial interest that might pose a potential, apparent, or real conflict of interest with regard to that faculty member's contribution to the program.

Medication Update for Primary Care

Wednesday, Nov. 18, 2009
Cedarbrook Conference Center
SeaTac, Wash.

About the Course

This course is designed to supply primary care providers with the latest information on medications. Course content will be clinically-oriented, informal, and interactive, with illustrative case presentation and opportunities for questions and comments.

Course Objectives

At the end of the conference, attendees will be able to:

- Articulate current pharmaceutical development, research, marketing, and approval processes at Group Health.
- Identify the different classes of antidepressant medications.
- Describe the mechanisms of action and common adverse effects of antidepressant medications.
- Utilize Group Health's depression guidelines in treating patients.
- Cite the medication titration protocols in Group Health's Collaborative Drug Practice Agreement.
- Discuss future plans for Medication Use Management at Group Health.
- Describe current medication safety guidelines.
- Recognize the major classes of chemotherapy and targeted agents.
- Discuss the role and toxicity profile of newer cancer agents.
- Identify evidence-based natural medicine resources for clinicians.
- Summarize the current state of flu vaccines and treatments.
- Incorporate different drug uses for diabetes into primary care.
