

## Registration & Accreditation

Tuition includes all educational sessions, course syllabus, and refreshments the day of the course. You will receive written confirmation of your registration. To receive Category 1 credit, providers are required to attest to how many hours they were actually present at the given activity by completing a Verification of Hours form provided by the CME office. Failure to return this form will result in denial of credit for that activity.

Group Health Cooperative is accredited by the Washington State Medical Association CME Accreditation Committee to sponsor continuing medical education activities for physicians. Group Health Cooperative designates this educational activity for a maximum of **7.5 hours in Category 1** to satisfy the re-licensure requirements of the Washington State Medical Quality Assurance Commission. Group Health Cooperative designates this educational activity for a maximum of **7.5 AMA PRA Category I Credit(s)**<sup>™</sup>. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Group Health Cooperative requires that faculty participating in a GHC CME activity disclose to the audience any relationship with a commercial interest that might pose a potential, apparent, or real conflict of interest with regard to that faculty member's contribution to the program.

## Oncology for Primary Care

Friday, October 16, 2009  
Cedarbrook Conference Center  
SeaTac, Wash.

#### About the Course

This course provides primary care physicians with the latest approaches for cancer screening and for evaluating and managing patients presenting with cancer in a primary care setting. Course content will be clinically oriented and offer a range of practices and resources to support improved patient care.

#### Target Audience

Primary care physicians and health care teams

#### Course Objectives

At the end of the conference, attendees will be able to:

- Apply current treatment options for symptom management in cancer patients.
- Discuss modern radiation oncology technology with patients and present a general overview of the indications for radiation treatment.
- Identify options for preventing, monitoring, and treating adverse reactions associated with the treatment of cancer.
- Identify and find the most current and authoritative medical information available on the Web for patients and providers.
- Review the evidence for the efficacy and role of exercise and alternative therapies in prevention and treatment of cancer, and understand how to advise patients in their use.
- Summarize the primary end of life documents and the ethical principles governing their use.

Continuing Medical Education

# Faculty
