

Group Health's strength comes from vibrant relationships with members, staff, volunteers and community partners. The Foundation builds and nurtures these relationships in a way that no other part of Group Health can. We create opportunities for those already invested in Group Health to step up and become donors—a very personal and generous way to contribute to everything Group Health stands for and achieves. Group Health Foundation supports and operates over 100 funds for Group Health members and our community.

Critical and Emergent Needs Fund supports the Foundation's *Partnership for Innovation* initiative that will help realize Group Health's vision of delivering affordable excellence for its patients by pilot-testing cost effective approaches that have the potential to improve patient care, along with programs and services that change and save the lives of patients and the community.
