- Information on policies for protecting the confidentiality of health information.
- Information on premiums and enrollee cost-sharing requirements.
- A summary explanation of the complaints and appeals processes.

- All stages of reconstruction of the breast on which the mastectomy has been performed.
- Surgery and reconstruction of the other breast to produce a symmetrical appearance.
- Prostheses.
- Treatment of physical complications of all stages of mastectomy, including lymphedemas.

This coverage will be provided in consultation with you and your attending physician and will be subject to the same cost share (annual deductible, coinsurance, and copayment) provisions otherwise applicable under the plan.

## Pharmacy benefit information

WAC 284-43-5040, WAC 284-43-5110, and WAC 284-43-5170

The following information applies only to health plans that have pharmacy benefits. This information is detailed in your plan's benefits booklet.

## Your right to safe and effective pharmacy services

State and federal laws establish standards to assure safe and effective pharmacy services, and to guarantee your right to know what drugs are covered under this plan and what coverage limitations are in your contract. If you would like more information about the drug coverage policies under your plan, or if you have a question or a concern about your pharmacy benefit, please contact Member Services.

If you would like to know more about your rights under the law, or if you think anything you received from your plan may not conform to the terms of your contract, you may contact the Washington State Office of the Insurance Commissioner toll-free at 1-800-562-6900. If you have a concern about the pharmacists or pharmacies serving you, please call the Washington State Department of Health toll-free at 1-800-525-0127.

**Does this plan limit or exclude certain drugs my health care provider may prescribe, or encourage substitutions for some drugs?**

Kaiser Permanente, working with pharmacists and physicians, has developed a drug formulary. A drug formulary is a list of preferred pharmaceutical products, supplies, and devices. Nonformulary drugs are not covered unless approved by your health plan as medically necessary or may be subject to a higher cost than formulary drugs, depending on the benefits of your specific plan.

Generic drugs will be dispensed unless a suitable generic is not available. If you elect to purchase a brand-name drug instead of the generic equivalent (if available), and it is not medically necessary, you will be responsible for payment of the additional cost above the generic drug charge in addition to your plan pharmacy cost share.

Over-the-counter drugs, supplies and devices not requiring a prescription under state law or regulations, drugs and injections for anticipated illness while traveling, drugs and injections for cosmetic purposes, and vitamins—including most prescription vitamins—are generally excluded from all plans. Exclusion of other categories of drugs will depend on your specific coverage plan. For example, drugs for treatment of sexual dysfunction are not covered unless your health plan covers treatment of sexual dysfunction. Contact Member Services to request a copy of the drug formulary for your specific plan. The drug formulary is also available at [kp.org/wa](http://kp.org/wa).

**When can my plan change the approved drug list (formulary)? If a change occurs, will I have to pay more to use a drug I had been using?**

Changes to the plan's drug formulary are implemented on an ongoing basis, based on an established evaluation process. The evaluation process includes review of scientific studies. The scientific studies reviewed must have

been published in health care journals or other publications in which original manuscripts are published only after having been critically reviewed for scientific accuracy, validity, and reliability by unbiased independent experts.

Your care provider or pharmacist will notify you when you refill a prescription if the prescribed drug is no longer included in the plan's drug formulary. When a drug has been removed from the plan formulary, it will not be covered unless your plan, at its discretion, elects to cover the drug for a limited time, or the drug may be subject to a higher cost depending on the benefits of your specific plan.

**What should I do if I want a change from limitations, exclusions, substitutions, or cost increases for drugs specified in this plan?**

- **Benefit changes**—Customization of your drug benefit occurs only through the contract process. Employer groups may choose to purchase higher or lower drug benefits each year when they renew their group contract. Individual and family contract benefits are renewed each year.
- **Formulary substitution**—Although individuals are not allowed to customize any plan drug formularies, health care providers can prescribe nonformulary medications for patients through a pharmacy exception process. The plan health care provider, in coordination with the plan pharmacy, will determine the medical appropriateness of substitutions. If a medical exception (substitution) is not approved, the patient is responsible for the full charge for the drug. Nonformulary drugs may be subject to a higher cost.

**How much do I have to pay to get a prescription filled?**

The amount of your out-of-pocket expense (cost share) depends on the specific pharmacy coverage you or your employer has purchased and on the medication prescribed. In general, the prescription copay or coinsurance amount applies for up to a 30-day supply of each covered prescription. If the actual charge for the drug is less than your cost share, you will pay only the actual charge for the drug. If your provider prescribes a noncovered medication, you will pay the actual charge for the drug.

If you have pharmacy coverage with a tiered cost share benefit, you will pay a lower cost share for generic drugs, and higher cost share for brand-name drugs. In addition, nonformulary drugs may be subject to a higher cost share.

**Do I have to use certain pharmacies to pay the least out of my own pocket under this health plan?**

Yes, you need to have your prescriptions filled at a Kaiser Permanente-designated pharmacy except for drugs dispensed for emergency services. All Kaiser Permanente medical offices have pharmacies located within the clinic. Additional retail pharmacies are also under contract to provide covered prescription drugs for members. When you use Kaiser Permanente-designated pharmacies, covered drugs are subject to the plan cost share. If you elect to purchase a noncovered drug, you will pay the actual charge for the drug. The plan directory of providers available at [kp.org/wa](http://kp.org/wa) lists pharmacies in your area.

You may be eligible to receive an emergency fill for certain prescription drugs filled outside of Kaiser Permanente’s business hours or when Kaiser Permanente cannot reach the prescriber for consultation. You will pay a cost share for your emergency prescription drug fill. Refer to your Benefits Booklet for more information. A list of prescription drugs eligible for emergency fills is available on the pharmacy website at [kp.org/wa/formulary](http://kp.org/wa/formulary). Members can request an emergency fill by calling 1-855-505-8107.

Call Member Services to find out which pharmacies are in your area, or if you anticipate needing to fill a prescription when you are traveling.

**How many days supply of most medications can I get without paying another copay or other repeating charge?**

Your plan contract allows up to a 30-day supply of prescription or refill per cost share amount. If you get a three-month supply of a maintenance drug, you will be charged three pharmacy cost share amounts. Depending on your plan, additional savings may be available for maintenance drugs through Kaiser Permanente mail-order services.

**What other pharmacy services does my health plan cover?**

A mail-order prescription refill service is available. Contact Member Services for your plan’s specific mail-order pharmacy benefits. At Kaiser Foundation Health Plan of Washington, the Pharmacy Department is involved in the development of clinical roadmaps and clinical guidelines. The Pharmacy Department participates in, or plays a role in, medication use and disease management programs for smoking cessation and for conditions such as diabetes, HIV/AIDS, asthma, depression, migraine headache, GERD (gastroesophageal reflux disease), and heart problems.
